DETAILED ACTION

Applicants' arguments, filed February 2, 2008, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Response to Arguments

Applicant's arguments with respect to claims 3 and 4 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3 and 4 rejected under 35 U.S.C. 102(b) as being anticipated by Pagel et al (provided by Applicant).

Claims 3 and 4 are drawn to a method of treating renal failure in a mammal and reducing the mortality of a mammal suffering from renal failure, comprising administering to said mammal levosimendan or its metabolite R)-N-[4-(1,4,5,6-tetrahydro-4- methyl-6-oxo-3-pyridazinyI)phenyl]acetamide.

Pagel et al teaches the administration of levosimendan to human patients with renal failure (insufficiency, p. 304, 1st paragraph). Pagel et al does not teach that this

method treats renal failure or reduces the mortality of the patients; however this therapeutic activity is an inherent property of the compound and is necessarily present. It is noted that In re Best (195 USPQ 430) and In re Fitzgerald (205 USPQ 594) discuss the support of rejections wherein the prior art discloses subject matter which there is reason to believe inherently includes functions that are newly cited or is identical to a product instantly claimed. In such a situation the burden is shifted to the applicants to "prove that subject matter shown to be in the prior art does not possess characteristic relied on" (205 USPQ 594, second column, first full paragraph).
